Tools
- Git & GitHub
- IntelliJ
- Visual Studio Code

My Portfolio website

Motivated software engineering graduate from LaunchCode Program with five months experience in software development. Seeking to use proven skills in JavaScript & Java via MVC architecture to develop web applications and software for everyday use.

Project Experience

Piri – City Rating App (Group project)

LaunchCode Liftoff Program   November 2020 – February 2021

Key Responsibilities

- Collaborated with group members and build a full stack web app based on Java MVC architecture.
- Developed most of the frontend works using Thymeleaf and Bootstrap.

Key Moments

- Identified and programmed code to display navigation bar based on user authentication status.
- Integrated Bootstrap to Thymeleaf to display images in bootstrap modals.

Gorkha Removals – Moving & Removals company website

Personal project   February 2021 – March 2021

Key Learnings

- Developed design and layout for the website.
- Integrated FormSubmit service to handle form submission by users.
- Added media queries to stylesheets for proper view on smaller screens.

Programming Education

LC 101 – Web Development Course

LaunchCode – St. Louis, MO   April 2020 – November 2020

- Pursued my passion for software development and learned the foundations.
- Figured out solutions to bugs and errors in my codes on my own and learned to write clean codes via online resources.
- Developed my personal portfolio website using Angular framework learned during the course.

College Education

BBA – Finance & Economics

Queens College   Graduated May 2011
